4. Right of Entry

- (a) If the services to be performed under the Scope of Work are to be performed on property controlled by Company, Company hereby grants KBL and its subcontractors the right to enter from time to time in order for KBL to fulfill the Scope of Work. Company understands that even though KBL will take reasonable measures to return the property to the condition it was in before KBL commenced its activities, the use of sampling and exploration equipment may cause some damage which cannot be fully corrected. Company also understands that the discovery of certain hazardous substances and conditions and/or the taking preventive measures relative to these substances and conditions may result in a reduction of the value of the property upon which the substance or condition is found to exist or the preventive measures are

taken. Accordingly, Company waives any claim against KBL and its subcontractors and agrees to defend, indemnify and hold KBL and its subcontractors harmless from any claim based upon the diminished value of real property allegedly arising from the discovery of a hazardous substance or condition or the taking of a preventive measure, unless such claim is based upon the negligent performance of services under the Scope of Work.

- (b) If the services to be performed under the Scope of Work are to be performed on property controlled by Company, Company shall notify KBL of the existence of any subterranean structures (pipes, tanks, cables, or other utilities, etc.) and KBL shall not be liable for damage or injury arising from damage to subterranean structures which are not called to KBL's attention. If KBL is required to locate subterranean structures on property controlled by Company, this service will be specifically stated in the Scope of Work.
- (c) If the Scope of Work is to be performed on property which is not controlled by Company, Company agrees to obtain permission from the party controlling the property to KBL's entry and the performance of the Scope of Work. Unless otherwise specified in the Scope of Work, it shall be assumed that Company does not know the location of any subterranean structures (pipes, tanks, cables, or other utilities, etc.) and it shall be KBL's obligation to ascertain such knowledge.
- (d) KBL agrees to schedule its activities to minimize interference with the on-going operations and activities of Company or any third party whose property may be the subject of the Scope of Work. KBL shall, and shall cause its subcontractors, to abide by all of Company's facility rules and regulations regarding the protection of health and safety of employees and third parties, but it shall be Company's obligation to make such rules and regulations known to the KBL prior to KBL commencing work at Company's facility. KBL shall have the obligation to determine if such rules and regulations exist with regard to facilities not controlled by Company.

5. Company Disclosures

- (a) Company shall notify KBL of any known or suspected hazardous substances or conditions on the property upon which the KBL's work or services are to be performed which in any way relate to or affect the Scope of Work and KBL shall have the right to rely on the accuracy of such Company-furnished information in its agreement to perform the work and services. Such hazardous substances shall include but not be limited to any substance or condition which poses or may pose a present or potential hazard to human health or safety or an adverse impact upon the environment. Thereafter, KBL shall take all reasonably necessary and appropriate measures to protect its employees, agents and subcontractors against possible hazards to health and safety and to prevent adverse impacts to the environment.
- (b) If the presence of an unanticipated hazardous substance or condition is discovered during the performance of the Scope of Work which could pose a hazard to KBL's employees, agents and subcontractors, KBL shall cease work and determine the necessary health and safety precautions to continue the Scope of Work. The cost of these necessary health and safety precautions shall be a change and shall be managed in accordance with Section 2.

6. Samples

- (a) Soil, rock, water and/or other samples obtained pursuant to the Scope of Work are the property of Company. KBL shall preserve such samples for no longer than sixty (30) calendar days after obtained in the field, unless other arrangements are mutually agreed upon in writing. Although Company shall be the owner of such samples, KBL, acting as a bailee and agent of Company, shall arrange for the lawful disposal of all samples. Disposal of contaminated samples shall be at the price set forth in the Proposal/Schedule of Fees. If the Proposal/Schedule of Fees is silent, then the disposal of contaminated samples shall be at the direct cost to KBL without any multiplier.

- (b) Although Company shall be the owner of all exploration debris, cuttings, pumpings, and borings generated by KBL during the performance of the Scope of Work, KBL, as agent of Company, shall arrange for the proper disposal of all exploration debris, cuttings, pumpings and borings generated during KBL's activities. Disposal of contaminated exploration debris shall be at the price set forth in the Proposal/ Schedule of Fees. If the Proposal/Schedule of Fees is silent, then the disposal of all exploration debris, cuttings, pumpings and borings shall be at the direct cost to KBL without any multiplier.

7. Reports and Ownership of Documents

- (a) KBL shall furnish electronic copies of each report required by the Proposal/Scope of Work to Company. Additional copies shall be furnished at the rates specified in the Fee Schedule. If paid for, KBL's Report to Company and the documents normally included in such Reports (laboratory results, boring logs, plume maps, etc.) are the property of Company. KBL may retain a copy for KBL's records. All backup documents (field notes, internal calculations and drafts, etc.) shall remain the property of KBL. However, KBL shall treat its performance of the Scope of Work and all information generated in the performance of the Scope of Work, whether the property of Company or KBL, as confidential, and shall not release such information to any governmental agency or third party without the written consent of Company, unless the release of such information is necessary to prevent injury to individuals or the environment.
- (b) KBL shall not publicize the performance of the Scope of Work for Company in any sales brochure, resume of work, or reference list without Company's written consent.
- (c) Unless set forth as part of the Scope of Work or otherwise required by law, KBL does not assume any obligation to and shall not report the results of its sampling, investigation, or analysis to any governmental authority or third party. Determining the need to report and the report of any hazardous substance or condition discovered as a result of KBL's performance of the Scope of Work shall be the obligation of Company.

8. Reporting Limitation and Conditions.

- (a) Reports issued by KBL are prepared in accordance with the defined scope of work, project specifications, and constraints outlined in the corresponding proposal or contract. The methodology, findings, conclusions, and recommendations contained in these reports are dependent on the specified project parameters and the resources allocated, including time and budget.
- (b) The findings, conclusions, and recommendations in KBL reports are based on our professional judgment and are consistent with the level of expertise typically exercised by professionals practicing under similar conditions within the relevant industry. While we strive for accuracy and diligence, no warranties, either expressed or implied, are extended beyond the scope of the professional services outlined in the reports.
- (c) Reports generated by KBL are valid only as of the date of issuance and may rely, in part, on information provided by third parties. If any of the information is subsequently found to be inaccurate, new data becomes available, site conditions change, or relevant standards are amended, modifications to the report may be necessary. KBL's responsibility for the report's use or any portion thereof is contingent upon a specific request to review and, if needed, update the report.
- (d) It is important to note that the results of our work should not be construed as a warranty that the subject site is entirely free from any contamination or other issues. Any soil and rock descriptions, along with related logs, notes, or drawings, serve to provide general information on subsurface conditions and should

not be considered as geotechnical data unless explicitly specified within the report.

- (e) References to groundwater, vapor, or other subsurface conditions are based solely on observations made at specific locations and times noted within the report. It is imperative to read the entire report as sections taken out of context may lead to misunderstanding.
- (f) KBL reports do not constitute or provide legal opinions. The contents of our reports are confidential and proprietary and should not be copied, distributed, or used in whole or in part without the express consent of the Company and KBL.
- (g) Any third-party use, reliance upon, or decisions made based on our reports are the sole responsibility of that third party. KBL disclaims liability for any damages that may result from the use of, reliance on, or decisions made based on our reports by third parties.
